Message from the Guest Editors

The purpose of this special issue is to combine a set of contributions that help us understand what it entails for ecosystems to be sustainable, by focusing not only on the organisational level, but by also taking into account the individual-, team- and any potential cross-level effects. We invite contributions from different disciplines (e.g., strategy, innovation, entrepreneurship, organisational psychology, management, organisational behaviour, etc.) and particularly welcome multi-disciplinary perspectives and research.
