Message from the Guest Editors

Dear Colleagues,

To combat global warming, the CO₂ emissions from energy systems worldwide must be reduced. However, the necessary transition of the energy systems also needs to be carried out in a sustainable way, to ensure that the transition is long-lived. This highlights the importance of sustainable energy planning. Sustainable energy planning is not only a question of which technologies will bring about a sustainable development in the energy sector, but also equally important are the organizational aspects surrounding these technologies, e.g., ownership models and regulatory issues. These aspects need to be understood and analyzed on a local, regional, national, and supranational level. Papers submitted to this Special Issue should address issues related to sustainable energy planning.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
