Message from the Guest Editors

This Special Issue addresses the sustainable provision of high-volume transport in developed and developing countries. It is recognised that transportation is vital for economic and social development. However, to realise these goals, transportation must be safe, affordable, reliable, and accessible to all in society. Transportation also needs to be sustainable without incurring excessive greenhouse gas consequences and environmental impacts. This Issue of *Sustainability* explores these ideals in the developing country context. Contributions are invited that address high-volume transport infrastructure and its sustainable management, low-carbon transport, and inclusivity in high-volume transport provision. Theoretical, empirical, and review studies are welcome from the researchers and practitioners alike.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
