Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to publish high-quality research papers on the inter-, multi-, and transdisciplinary field of new theory, methods, technologies, as well as policy implementation and scenarios apropos of sustainable water, energy, and food security. The corresponding research questions to be addressed include but are not limited to (1) how to identify and tackle water, energy, and food risks in terms of SDGs 2, 6, and 7; (2) how to identify the interlinkages and interdependencies among water, energy, and food risks as well as other environmental challenges across the 2030 Agenda; and (3) how to examine which policies of water, energy, and food security have worked best in which circumstances, under what governance arrangements, and whether that experience is transferable to other contexts.

Dr. Jialiang Cai

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
