Message from the Guest Editor

We are pleased to announce the development of a Special Issue on “Sustaining Rangeland Ecosystems for the Benefit of Society”. Grasslands, shrub steppes, savannahs, and other rangeland ecosystems comprise almost 50% of the Earth’s land surface (~3.4 billion ha). Rangelands are diverse working landscapes that provide multiple ecosystem services including food, fiber, fuel, clean water, climate regulation, and biodiversity, directly supporting nearly one-third of the world’s population across a suite of cultures. The long-term sustainability of rangelands and dependent communities is a central challenge facing global society today. Papers can be reviews, syntheses, viewpoints, meta-analyses, and original research relevant to the environmental, ecological, biological, agricultural, policy, human, development, economic, or technological aspects of sustainability on rangelands systems anywhere on the globe.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
