Institute of Marine Biological Resources and Inland Waters, Hellenic Centre for Marine Research, Athens, Greece

**Dr. Ioannis Panagopoulos**

Department of Hydraulics, Soil Science and Agricultural Engineering, School of Agriculture, Aristotle University of Thessaloniki, 54124 Thessaloniki, Greece

Deadline for manuscript submissions:

**closed (16 December 2022)**

### Message from the Guest Editors

New applications and methods in water resources management, complemented by technological developments, are expected to improve efforts towards the sustainability of natural water resources. For example, technologically advanced applications including unmanned aerial systems (UASs), underwater acoustics, and digital photogrammetric processing techniques have contributed to quicker, more cost-effective, and more frequent data collection—improving our understanding of the status of water resources. At the same time, it is essential to standardize these procedures to a broad range of environments and conditions, providing great potential for new research opportunities and challenges.

The purpose of this Special Issue is to promote research related to the contribution of technologically advanced applications and methods to water monitoring and management.

We look forward to receiving your contribution.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
