Deadline for manuscript
submissions:

30 April 2025

Message from the Guest Editors

Achieving an optimal indoor environment quality (IEQ) level within a building is important to occupants' health, wellbeing, and productivity. The advent of the COVID-19 pandemic across the globe accorded IEQ substantial attention and elucidated the urgent need for better design and management for indoor spaces. A poor IEQ can lead to various health issues and associated costs in residential and commercial buildings. With population growth and people spending more time indoors, healthier buildings are now required.

Green energy uses renewable energy sources and reduces the reliance on fossil fuels and greenhouse gas emissions (GHG). With innovative technologies and strategies, green energy has advanced in providing sufficient energy for buildings. In particular, these technologies can support lifecycle building operations, ensuring the continuous provision of optimal IEQ levels.

This Special Issue aims to highlight recent studies, policies, and trends in IEQ and green energy with the aim of increasing knowledge and documenting technological advancements in this field.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
