Message from the Guest Editors

Dear Colleagues,

The Special Issue focuses on harnessing waste as a resource in the development of green materials. In the face of pressing environmental concerns, this topic gains significance by addressing the urgent need for sustainable practices in material production. By repurposing waste materials, it not only minimizes the environmental impact associated with conventional production processes but also contributes to a circular economy. Its importance lies in the potential to reduce both emissions and energy consumption, offering innovative solutions for eco-friendly material synthesis. This approach aligns with the broader global imperative to transition towards greener alternatives, thus fostering a paradigm shift in material production that is essential for a more sustainable and resilient future.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
