Message from the Guest Editors

Dear Colleagues,

The lack of natural resources, overpopulation in urban areas and the pollution generated in them are worrying aspects that we are dealing with today. The population must be aware of contributing to avoid the disastrous consequences that these events can cause on the planet.

Usually, many of these problems are attributed to the technological expansion and its impact on society. But, as a matter of fact, technological evolution can help alleviate these effects if used properly.

Therefore, this special edition of the journal Sustainability is focused on the use of innovative technologies that, applied in cities, allow to automate and reduce the power consumption of daily activities, monitor traffic, monitor the quality of several environmental parameters and/or be able to analyze this data in order to offer recommendations to improve the parameters indicated before.

To this end, new technologies in the field of machine learning and IoT...

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
