Deadline for manuscript submissions:

closed (15 March 2022)

Message from the Guest Editor

The challenge of reaching 100% renewable cities must rely on different technologies for energy production that should be opportunely linked at different levels (country, region, city). District heating connected to thermal storage represents an interesting option to reduce pollutant emissions for house space heating, even more in a Multi-Energy context (heat, electric and gas) since thermal grids represents a cheap buffer for the energy excess (i.e. conversion by power to heat). Despite thermal storage, district heating and multi-energy systems are expected to play a significant role for an efficient energy supply to buildings, they are still characterized by limitations that require further research efforts.

This Special Issue will comprise a selection of papers presenting original and innovative contributions on the above bullet points and, in general, in the following main fields:

1. thermal storage technologies and their integration for urban/building-scale and multi-energy applications;
2. district heating and multi energy system in the transition towards future sustainable societies.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
