Message from the Guest Editors

The topic of current and future issues in transportation safety and sustainability is extremely relevant today as the world aims to achieve a 50% reduction in death and severe injuries over the next decade (World Health Organisation's *Decade of Action for Road Safety 2021–2030*). Relevant research addressing this topic in high-, middle- and low-income countries is clearly warranted to help achieve this target.

This Special Issue aims to attract scientific papers that identify key issues of important measures, policies, and strategies to help address this enormous health problem. The use of a Safe System approach is internationally acclaimed as the appropriate means, and research on this topic by governments and researchers worldwide and papers adopting this approach are particularly encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
