Message from the Guest Editor

Dear Colleagues,

We need sustainable solutions for the issues facing global food security without compromising the environment, food safety, and wellbeing of the population to achieve the United Nations' Sustainable Development Goals (SDG). Sustainable food security requires the following: (a) availability of food or sufficient food production; (b) access to food and ability to purchase food; (c) sufficiency in terms of nutrition including energy, proteins and micronutrients as well as safety; and (d) the stability and foreseeability of these conditions. The tools and strategies used to achieve sustainability in food security must align with environment protection, food safety, and public health and wellbeing of the population.

This Special Issue explores and discusses the pathways and challenges of achieving sustainable food security and the trade-offs between sustainability, food security and wellbeing by utilising economic frameworks while being receptive to interdisciplinary approaches.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
