Message from the Guest Editors

Sustainable supply chain management (SSCM) faces unprecedented volatility and frequent disruptions. The challenges ahead for academics and practitioners call for new paradigms to strengthen resilience and improve SSCM learning in more equitable and just closed-loop SC and circular economies. The aim of this Special Issue is to explore the various operations management and logistics challenges facing SSCM in the era of sustainability transitions and Industry 4.0. Transitions encompass transformations in culture, ideologies, policies, laws and regulations, technologies, consumer behaviour, manufacturing, and services operations. This Special Issue welcomes researchers from a variety of fields interfacing SSCM and sustainability transitions such as management, engineering, economy, and related disciplines, willing to contribute original and high-quality research papers to fulfill our aim. For more details, please visit the Special Issue homepage by clicking mdpi.com/si/135089

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
