Message from the Guest Editors

It has long been accepted that patterns of urban sprawl that characterize cities in the global North are unsustainable and to be avoided. It is equally well understood in the global South that urban population densities do not necessarily equate to healthy and livable cities. These different perspectives are further complicated when officials mandate “social distancing” to protect public health. Simply put, contextual (landscape, environment, and spatial economies) and qualitative (historical, cultural, social) dimensions of cities, urban living, and urban form matter. This Special Issue comprises papers that drill down, problematize, and rethink compactness and urban density as incontrovertible planning and design principles of sustainable cities.

Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
