Sustainable Urban Water Landscapes and Blue-Green Infrastructure

Guest Editors:

Prof. Dr. Maria Ignatieva

School of Design, The University of Western Australia (UWA), 6009 Perth, Australia

Prof. Dr. Dagmar Haase

Lab of Landscape Ecology, Department of Geography, Humboldt University Berlin, Rudower Chaussee 16, 12489 Berlin, Germany

Dr. Diana Dushkova

Humboldt University, Berlin, Germany

Deadline for manuscript submissions:

closed (31 March 2022)

Message from the Guest Editors

Dear Colleagues,

In this Special Issue, the questions which can be discussed range from urban hydrology and coastal urban ecosystems and their resilience to climate change to the design of sustainable waterfronts, restoration and conservation of urban rivers, lakes, streams, and marine ecosystems as well as innovative approaches, such as water-sensitive design and low-impact design that can help to create a new generation of sustainable urban landscapes. In addition to these questions, other areas could be covered —for example, integrated sustainable planning and design and management of blue-green infrastructure. We also welcome papers that analyze environmental and socioeconomic benefits of blue-green infrastructure and nature-based solutions promoting sustainable green and blue urban areas.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
