

Advanced Electric Energy Conversion and Operation Control Technology of Power Distribution System with High Proportion of Renewables and Power Electronics

Guest Editors:

Dr. Fei Jiang

School of Electrical & Information Engineering, Changsha University of Science & Technology, Changsha 410114, China

Dr. Qi Guo

Institute of Electrical and Information Engineering, Hunan University, Changsha 410082, China

Deadline for manuscript submissions:

closed (31 December 2023)

Message from the Guest Editors

Scholars and researchers engaged in related research are invited to contribute to the discussion of new theories, new methods and new technologies in this field, and to promote technological development in this field. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Analysis, perception and prediction of power characteristics for renewables and flexible loads;
- High-performance and low-cost implementation technology of DC/DC, DC/AC, and AC/DC converters for renewables and flexible loads;
- Grid-friendly connection and active support technology of distributed flexible resources in power distribution systems with high shares of renewables and power electronics;
- Operation control optimization technology of power distribution system with a high proportion of renewables and flexible loads;
- New control and protection technology under typical faults of power distribution systems with a high proportion of renewables and flexible loads.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
