Message from the Guest Editors

Dear Colleagues,

As it is known, agriculture production is similar to a factory working in atmospheric conditions. As a result, to adapt to the changing climatic conditions in terms of agriculture, it is necessary to breed new varieties that are highly tolerant to biotic and abiotic stress factors; to use new approaches and models that will adapt to possible changes in irrigation, fertilization systems and land plant use; to develop new perspectives on the fight against diseases, pests and weeds and the necessary infrastructure and research activities in these areas; and to increase financial support and national and international cooperation on these issues. Thus, realizing sustainable development has become a global priority in particular for agriculture.

This Special Issue on “Green Agriculture for Sustainable Development: Cultivation Methodologies, Techniques and Improving New Varieties” will be a collection of primary research articles reporting hypothesis-driven investigations that provide new insights into sustainable agriculture and that determine productivity and properties for more exploitation.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
