Deadline for manuscript  
submissions:  
**closed (31 August 2023)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to collect relevant scientific contributions on the impacts of land use change and functional biodiversity loss on tropical ecosystem functions. In order to advance our general and theoretical understanding of how tropical land use change and functional biodiversity loss affect ecological processes and biogeochemical cycling, we want to find common trends and cross-cutting themes among various ecosystems and geographical locations. This could include research using remote sensing or field measurements using experimental, observational, or modeling techniques. Studies on direct and indirect influences of recent or past human disturbances on tropical ecosystems are invited. This includes direct human interventions such as selective logging, land clearing for farming and forestry, as well as indirect interventions like climate change, modifications on the troposphere's chemistry (including atmospheric depositions), the introduction of invasive species, or changes to disturbance patterns.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
