Deadline for manuscript  
submissions:

**closed (31 March 2022)**

### Message from the Guest Editor

Potato is the third most important food crop in the world after rice and wheat in terms of human consumption. As it is vegetatively propagated, huge amounts of virus-free planting material (i.e., seed potatoes) are needed annually worldwide. In vitro microtubers may offer advantages for the storage and transport of pathogen-free germplasm over cuttings in the seed production system. Numerous studies from many countries during the last three decades reported that the in vitro tuberization of potato is influenced by the carbon and nitrogen source of the medium, plant growth regulators, culture conditions (temperature and photoperiod) and systems, etc. In addition to in-depth physiological studies, comprehensive and systematic studies are needed to develop the microtuber seed production system which will be released on the commercial market.

This Special Issue is focused not only on potato but also on other tuber-bearing crops, such as yams, lilies, etc. We welcome research articles and reviews that address any aspect of the in vitro tuberization of potato and other tuber crops.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
