Message from the Guest Editors

Ecosystem degradation and water pollution are global threats to the sustainability of flora, fauna and human mankind. Nature-based solutions (NBSs) are emerging as an important trend for developing low-cost and efficient technologies. However, there is still the need for more pilot plant and field studies to establish design parameters, various types of applications, large-scale performance evaluation and the demonstration of their socio-economic feasibility, among other important topics.

The aim of this Special Issue is to gather in-depth information related to different NBSs oriented towards wastewater treatment and also to the restoration of degraded and/or polluted ecosystems. For this Special Issue, original research articles and reviews are welcome.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
