Message from the Guest Editors

The collection and treatment of wastewater was a fundamental achievement of the last century. The current challenge (plants of the future) is characterized by two main goals: 1) increasing the purification efficiency (with a focus on trace pollutants, microplastics, antibiotic resistant genes) and 2) shifting the paradigm towards the concept of biorefinery (thus recovering material resources and energy from wastewater). In light of this challenge, the environmental impact of these actions and measures must be accounted for, (environmental) sustainability being the main driver of the whole process. Therefore, this Special Issue is intended to bring together recent research or reviews on the above topics, so as to build a reference toward the definition of a standardized approach for assessing the environmental footprint of wastewater treatment facilities, this being recognized as a fundamental aspect of the decision-making process for the development of suitable solutions for environmental protection.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
