### Message from the Guest Editors

In the last few decades, the amount of wastewater and generation of waste has grown with increasing population, industrialization, and urbanization. This has a significant impact on the natural environment. Therefore, it is necessary to develop efficient and intensive methods for wastewater and solid waste treatment.

This Special Issue comprises papers concerning the management of i) municipal wastewater and other kinds of wastewater that can be biologically treated, ii) municipal solid waste, including biodegradable organic waste, and sewage sludge, and iii) waste from agri-food industries. The Special Issue is dedicated to advance and disseminate knowledge in research and applications of modern and advanced technology used for waste and wastewater treatment.

### Keywords

biological wastewater treatment  
biomass yield and sludge production  
landfill leachate  
reject water  
pharmaceuticals in wastewater and sewage sludge  
sewage sludge management  
municipal solid waste management  
anaerobic digestion  
biogas production from organic waste  
aerobic stabilization  
composting

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
