Message from the Guest Editors

Dear Colleagues,

Water is the primary resource in agriculture. Estimates indicate that 70% of the water used by humans in the world is destined for irrigation, and irrigated crops are responsible for about 45% of world food production. Thus, water may limit food production, even in areas where temperature, soil, and light are ideal for plant growth. Subtropical areas may also suffer, demanding changes in agricultural systems. Researchers have to provide better ways to preserve freshwater resources and store water. It is necessary to improve irrigation systems; breed plants with an increased ability to acquire water from the soil, improve water use efficiency, and tolerate salinity; develop new methods to supply water to plants; and produce new molecules to help plants to retain and use water efficiently, among several other important subjects related to water in agriculture. The focus of this Special Issue is on development of the sustainability of water in agriculture in tropic and subtropic regions. We welcome manuscripts in any area from practical field research to social and economic aspects so long as they maintain this focus.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
