Message from the Guest Editors

The Special Issue aims to collect high-quality papers addressing the relationship between cyber security and sustainability with current and emerging technologies, particularly artificial intelligence. The topic can be discussed from the perspective of either the technical dimension in terms of analytics, artificial intelligence (AI), machine learning; or in business in terms of developing necessary strategies; or social dimensions such as human and organizational factors; or combinations of these perspectives.

This track welcomes research using qualitative, quantitative and design science research methodologies. Conceptual papers, models, policies and case studies contributing to understanding the relationship between sustainability, cybersecurity and recent and emerging technologies are also within the scope of this Special Issue.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
