Message from the Guest Editors

In recent years, the traditional logistics and transportation industry has been a heavy burden on the ecological environment and has caused a series of environmental problems (Jazairy, 2020). The increasingly serious environmental situation forces traditional logistics transportation, such as multi-modal transportation, air transportation, and maritime logistics, to gradually turn to green development (Peng et al., 2022). Although green logistics is more environmentally friendly than traditional logistics, it also brings some new issues, such as environmental logistics (Wang et al., 2022) and green supply chain management (Jin et al., 2021).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
