### Message from the Guest Editors

We invite qualitative, quantitative, and conceptual papers to contribute to a better understanding of what enables the full potential of entrepreneurship to innovate products, services, and processes with a lasting positive impact on sustainability. Adopting a broad understanding of sustainability that includes both environmental and social issues, we are open to papers from various disciplines. We encourage researchers to unearth macro- and micro-level mechanisms both internally (e.g., the entrepreneurial team, processes, values, mindsets, organization, innovation, or start-up strategies) and externally (e.g., legal framework, networks, ecosystems, stakeholders or shareholders) through which entrepreneurship can fulfil its promise for sustainability. We further welcome papers which critique or question the potential of entrepreneurship or investigate its boundary conditions for making a positive impact on sustainability.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
