Message from the Guest Editors

This Special Issue aims to seek case studies and best practices that improve sustainability in the building and construction sectors, enterprises, and/or projects, e.g., environmental protection, social progress, and/or economic development. The editing team invites researchers to showcase their thoughts, applications, studies, developments, innovations, findings, experiences, recommendations, and other issues. Accordingly, the topic of this issue is “Towards sustainable construction: Best practices”, which may consist of (but is not limited to) the following subtopics in the building and construction domains:

- Sustainable development conceptions and objectives in the sector
- Environmental constraints and protection
- Social constraints and responsibilities
- Trade-offs of profitability and sustainability
- Laws, standards, and policies
- Construction education for sustainability
- Monitoring techniques and evaluation systems
- Sustainable construction industry management
- Sustainable construction enterprises management
- Sustainable construction project management
- Green construction certification and code
- Green construction methods and techniques
