Deadline for manuscript submissions:

**closed (25 December 2024)**

### Message from the Guest Editors

Dear Colleagues,

Digital technology is fundamentally transforming virtually every industry, the engineering field has witnessed disruptive changes in recent years. Research areas may include, but are not limited to:

- Artificial intelligence and machine learning applications for sustainable engineering management;
- Automation in capital projects, with a particular focus on mega-infrastructure projects, onshore and offshore drilling, power plants, industrial plants, and other engineering procurement construction (EPC) projects;
- Digitalization in the engineering and construction industries for sustainable infrastructure development;
- Building information modeling (3D-4D-5D BIM) and their applications;
- Advanced work packaging (AWP) with BIM;
- BIM-based Maintenance Repair and Operation (MRO) systems;
- Digital Twin or Digital Transformation for industrial plants;
- Natural language processing (NLP) application and text mining in construction project documents;
- chatGPT Applications in the engineering and construction field;
- Cost engineering digitalization (estimating and control):

Look forward to receiving your contributions.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
