### Message from the Guest Editors

The promotion of Zero Energy Building (ZEB) was considered the most efficient way in response to these goals in the building sector. This Special Issue will cover the latest progress in policy, technology research, standards, and case studies of ZEB; assist the building industry to harmonize the terms and definitions that are linked to ZEB; discuss potential technical solutions with affordable incremental cost; and how to set minimum requirements to promote the component industry, supporting and nurturing building sector make more contribution to climate change mitigation and carbon emission reduction.

This Special Issue aims to collect contributions that include, but are not limited to, the following topics of interest:

Investigate the current policies and their effects;  
State-of-the-art decarbonization technologies;  
Study and enforcement of ZEB codes and standards;  
Investigation of the current practices of ZEB.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
