Message from the Guest Editors

This Special Issue covers various subjects related to technologies for advanced sustainable polymeric materials. Three areas for polymer researchers to address in the field of sustainable polymeric materials include, but are not limited to, the following:

- to lower carbon emission and energy consumption of producing polymeric materials;
- to realize a circular economy of polymeric products;
- and to reduce usage and generation of toxic substances before, during, and after producing polymeric materials.

Original works within the scope are invited and literature reviews are also highly appreciated.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
