Department of International Affairs, College of Arts and Sciences, Qatar University, Doha 2713. Oatar

Deadline for manuscript

closed (26 September 2022)

# submissions:

Over the last few decades, food systems have been central in the debate on sustainable development, such as in the context of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals (SDGs). The challenges have been exacerbated by the COVID-19 pandemic that has highlighted the unsustainability and vulnerability of modern food systems and caused an impending global food emergency.

This Special Issue addresses but is not limited to the following topics:

- Conceptualization, design, and operationalization of sustainable food systems at different levels (global, regional, national, city-region, local);
- Methods, approaches, and models for the assessment of agri-food sustainability in food (production/agriculture, distribution, consumption, waste management);
- Sustainability transitions in agri-food systems (theories, frameworks, models, good practices, and promising initiatives);
- New generation of food policies (integrated, multisectoral) and governance models (inclusive, multi-stakeholder, reflexive) for sustainable food systems;
- Effects of the COVID-19 pandemic functioning, performance and resilience of agrifood systems.

## **Editor-in-Chief**

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

## **Message from the Editor-in-Chief**

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
