Message from the Guest Editors

Soils are becoming more and more important in achieving the Sustainable Development Goals of the United Nations and mitigating the effects of global warming. The aim of this Special Issue is to improve the available information about strategies that favour the sustainable management of soils.

Research and review articles focusing on soil's physical, chemical and biological properties and ways to improve them in order to provide good ecosystemic services, control pollution and mitigate and favour carbon sequestration are the main targets. However, many other aspects can be taken into consideration.

Social issues related to soil and sustainability, as well as scientific matters, are welcome. Technical and scientific solutions need to be understood prior to the application, and social conviction that they are good tools is needed. Moreover, examples of good practices such as those derived, for instance, from international projects like those developed under the LIFE program of the European Union are welcome, as well as strategies and examples from developing countries.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
