Message from the Guest Editor

Dear Colleagues,

Air pollution is currently considered as one of the main risk factors for global deaths, and it is a major threat to environmental sustainability. Regular air-pollution-monitoring programs are a basic step to mitigating any air-pollution-related future disasters, to guide possible strategies to achieve a sustainable future, and to warn the citizens about potential adverse health effects. Air pollution monitoring can create general awareness about the effects of air pollution and how it impacts human well-being. This Special Issue is intended to provide a platform for studies that examine the impacts of air pollution on environmental sustainability. We invite submissions that closely interlink air pollution with sustainability indicators, and how air pollution monitoring can help to achieve the sustainability goals.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
