Changes in Atmospheric Environment

Guest Editors:

Prof. Dr. Baozhu Ge

Institute of Atmospheric Physics, Chinese Academy of Sciences, Beijing 100029, China

Prof. Dr. Xuejun Liu

Department of Environmental Science and Engineering, College of Resources and Environmental Sciences, China Agricultural University (CAU), Beijing 100193, China

Dr. Syuichi Itahashi

Sustainable System Research Laboratory (SSRL), Central Research Institute of Electric Power Industry (CRIEPI), Abiko 2701194, Japan

Deadline for manuscript submissions:

1 October 2024

Message from the Guest Editors

Dear Colleagues,

Long-term observation networks for air pollutants, comprehensive field measurements, and model simulations for the analysis of air pollution improved our scientific knowledge of the atmospheric environment. However, the connection between the changes in the social and environmental sciences remains unclear, and investigations into these changes are urgent and important to expand the knowledge of this research area.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Air pollution and climate change.
- Long-term measurement and simulation on air pollution.
- Relations between the changes in the atmospheric environment and human beings.
- Prediction of future changes in the atmospheric environment.
- Changes in the atmospheric environment, from Asia to worldwide.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
