closed (31 December 2020)

Message from the Guest Editor

Dear Colleagues,

Product lifetime plays an increasingly crucial role in academic, business, and policy discussions. As topical research has advanced, it has become increasingly clear that the issue of shortening product lifetimes is a systemic one which requires profound changes in business models, a shift toward improved product design, the identification and promotion of existing product lifetime extension business models, changes in regulation, and changes at the consumer level.

This Special Issue will gather original research in the field of product lifetime, and how business model strategies, corporate initiatives, consumer practice, regulation, and new technology can contribute to extend product lifetimes. Suitable topics include but are not limited to the following: consumer product lifetime perception, consumer expected product lifetimes, design strategies, industry 4.0 for product lifetimes, product lifetime extension business models, product lifetimes measure, et al.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
