Message from the Guest Editors

Dear Colleagues,

A smart energy platform has recently received considerable attention in response to climate change and the ever-increasing demand for energy. It can reduce greenhouse gases through renewable energies, energy storage systems, and so on. Herein, big data analysis and artificial intelligence technologies could assist in practical sensor-based data analysis in the smart energy platform. By extending these technologies, the smart energy platform can establish optimal energy strategies and plans to benefit consumers and producers.

This Special Issue solicits original research and survey papers that address diverse smart energy platform technologies based on big data and AI techniques, as follows:

- AI-based sustainable energy forecasting;
- Energy Strategy and Planning;
- Visualization of energy production and consumption within the smart energy platform;
- Probabilistic forecasting of renewable energy and their economic analysis;
- Cyber security technology for smart energy platform management;
- Designing a relational database for regional distributed energy; resource analysis

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
