

Sustainable Bio-Based Nanomaterials for Various Biological Applications

Guest Editors:

Dr. Sekar Vijayakumar

Marine College, Shandong University, Weihai 264209, China

Prof. Dr. Roberto Christ Vianna Santos

Laboratory of Oral Microbiology Research, Microbiology and parasitology Department, Universidade Federal de Santa Maria, Santa Maria RS 97105-900, Brazil

Dr. Ramanathan Srinivasan

Natural Product Research Center of Excellence, Prince of Songkla University, Chang Wat Songkhla 90110, Thailand

Deadline for manuscript submissions:

closed (31 March 2023)

Message from the Guest Editors

Bio-based nanomaterial synthesis is both environmentally friendly and cost-effective, and it can be readily scaled up for large-scale manufacturing. As a result, in the field of biological sciences, the synthesis of bio-based nanomaterials has received much interest. Sustainable bio-based methods will not only protect us from chemical toxicity but also allow us to develop more biocompatible nanomaterials.

With this Special Issue, we aim to collect a series of high-quality research and review manuscripts covering promising, recent, and novel research trends in sustainable bio-based nanomaterials with great possibilities regarding biological applications such as in antimicrobials, antibiofilm, anti-quorum sensing, antiviral, anticancer, antiparasitic, mosquito control, food packaging, environmental remediation, etc.

In addition to above, we also welcome various research contributions related to other biological applications of bio-based nanomaterials.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
