Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we invite studies that aim to increase our understanding of the urban contribution to biodiversity conservation or that envision pathways towards developing or managing biodiverse urban environments.

Contributions to this Special Issue are expected to address:

- The role of urban environments for species, communities, or ecosystems of conservation concern in relation to urbanization, urban land uses, management, and other types of human interference.
- Mechanisms that drive urban biodiversity loss or underpin the survival of species of conservation concern in urban environments.
- The intersection between biodiversity conservation and the valuation and use of urban nature by urban people.
- The integration of biodiversity conservation into sustainable urban development, particularly into urban planning, environmental education and the urban green infrastructure, and into the development, management, or restoration of urban ecosystems.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
