Message from the Guest Editors

Throughout the world, bioenergy is becoming more relevant, increasingly replacing other types of non-renewable sources such as coal or natural gas. However, in the context of sustainability, bioenergy exerts positive and negative impacts on a variety of environmental and economic problems. This special issue aims to discuss the problems and impacts of bioenergy in society, taking into account the technical, economic, cultural, energy and environmental policies of the countries.

This special issue seeks original contributions on the developments in the technology of obtaining energy from the biomass or waste derived from it, and its involvement at an environmental and economic level. Potential topics include but are not limited to: thermoconversion of biomass and derived waste, combustion, pyrolysis, hydrothermal carbonization. Anaerobic digestion processes, microbial fuel cells. Life cycle assessment of biomass and waste treatment processes derived from biomass. Calculation of the carbon footprint for all processes of obtaining bioenergy.

an Open Access Journal by MDPI

Editor-in-Chief

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
