### Message from the Guest Editors

This Special Issue aims to bring together all the recent advances in biomass conversion technologies with particular regards to those applicable at small or micro-scale and characterization of the properties and applications of the so-obtained carbonaceous renewable materials. The focus is on the thermochemical conversion of biomass for fuel production and biomass-based carbons for energy applications; the aim is to provide a state-of-art overview of knowledge of the field of thermochemical conversion of biomass and technology advancements, as well as knowledge of efficient energy devices using biomass-based carbons.

Deadline for manuscript  
submissions:

**closed (30 June 2018)**

an Open Access Journal by MDPI

## Editor-in-Chief

Faculty of Engineering and  
Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
