Message from the Guest Editor

Dyes and heavy metals are two major groups of pollutants that contaminate the water bodies with discharge from various industries, such as the textile and dyeing industry, leather tanning, paper and pulp, electroplating, pharmaceuticals, food processing and mining industries. Heavy metals, and sometimes dyes, also contaminate the soil, affecting plant growth and productivity. Plant-based phytoremediation, which may also be microbe-assisted, has been found to be a successful approach to decontaminate such polluted sites.

The following themes would be of particular interest (note that this list is not exhaustive):

- Studies on various microbial systems for bioremediation of metals/dyes;
- Studies elucidating mechanisms of bioremediation of metals/dyes;
- Bioelectrochemical approaches (MFC, MEC) for bioremediation of metals/dyes and resource recovery;
- Ecotechnological approaches (constructed wetland) for dye/ heavy metal removal;
- Phytoremediation approaches;
- Hybrid systems for metal/dye bioremediation;
- Bio-nanotechnological studies for dye/metal removal;
- Pilot-scale studies on bioremediation with technical and economic feasibility analysis.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
