closed (30 November 2023)

Message from the Guest Editors

Black carbon (BC), one of the most important constituents of atmospheric pollutants, is mainly emitted by the incomplete combustion of fossil fuel and biomass/biofuels. Being absorbing in nature, it can heat the atmosphere by absorbing solar radiation and changing the surface snow albedo after deposition. It is the second-largest contributor to global climate warming after CO₂ and also gained large attention among scientific communities due to its inimical impact on air quality, human health, hydrological cycle, carbon cycle and global climate change. An in-depth understanding of BC characteristics and their impact on different aspects is highly needed, which will be helpful for the policymakers at the regional as well as global scale.

This Special Issue is focused on examining the different BC characteristics and their various impacts. Original results related to BC characteristics, their source apportionment, transport mechanism, impact on air quality and climate along with review papers are all welcome as contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
