

Sustainable Building Materials and Life Cycle Assessment (LCA)

Guest Editors:

Prof. Dr. Adriana Estokova

Institute for Sustainable and Circular Construction, Faculty of Civil Engineering, Technical University of Kosice, Košice, Slovakia

Prof. Dr. Dagmar Samesova

Department of Environmental Engineering, Faculty of Ecology and Environmental Sciences, Technical University in Zvolen, Slovakia

Deadline for manuscript submissions:

closed (31 December 2020)

Message from the Guest Editors

Today, sustainability principles should be applied to all sectors, including construction, which ranks among the sectors with the most negative environmental impacts. Great emphasis should be placed on sustainable innovation in material research and technologies in close connection with climate change mitigation and the protection of natural resources. The Special issue is focused on building material development with the aim to extend the life of materials, improve their functional properties, develop targeted intelligent materials, and, in line with the circular economy, develop waste-based materials. A significant factor is how such building materials will be burdening the environment, and therefore, this Special issue also aims to provide the opportunity to present the results of environmental assessment of building materials and buildings through a wide range of LCA methods.

an Open Access Journal by MDPI

Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
