Message from the Guest Editors

Building design processes and the level of commitment to sustainable principles are influenced by numerous factors related to the market, local regulations, and the general culture of the industry. Pushing all these influential factors toward achieving accelerated changes in industry and people's mindset and lifestyle with a view to drastically reducing greenhouse gasses emissions is not only a challenge but an obligation.

This Special Issue calls for papers which reflect upon advances in building design processes leading to sustainable architecture in its broad sense. Papers covering not only drivers, but also threats and obstacles to implementing proven theoretical and practical design methods, are welcomed.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
