Message from the Guest Editor

Sustainability concerns a diachronic principle of construction applied in architectural assets from ancient times until the present. Natural resources in addition to energy and cost saving during construction and throughout the life cycle of buildings are usually of primary interest. To this extent, the maintenance and repair strategies, applied both in historic and contemporary structures, are also significant aspects to be taken into account.

The Special Issue invites reviews, original research articles, and state-of-the-art contributions dealing with the abovementioned axes in order to envisage key parameters influencing durability, energy efficiency, structural integrity, performance requirements, and maintenance of constructions through the prism of sustainability.

Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
