Sustainable Building and Sustainable Indoor Environment

Guest Editors:

Prof. Dr. Alireza Afshari

Department of the Built Environment, Aalborg University, 2450 København, Denmark

Prof. Dr. Jinhan Mo

Department of Building Science, Tsinghua University, Beijing 100084, China

Prof. Dr. Matthew Johnson

Department of Chemistry, University of Copenhagen, Universitetsparken 5, DK2100 Copenhagen, Denmark

Deadline for manuscript submissions: closed (31 October 2021)

Message from the Guest Editors

People spend most of their time indoors. Therefore, indoor air quality is an important public health issue, as people are exposed to pollutants there, including gases and particles, which come from outdoors, or generated indoors by cooking, etc. There is an increasing range of adverse health effects linked to air pollution, at an even lower concentration of pollutants. Increased ventilation, recirculation of air through portable air cleaners has been discussed by researchers. A large variety of air filtration technologies are commercially available for removing air pollutants. Different technologies are based on different air filtration mechanisms and are able to remove different pollutants.

The scope and purpose of this Special Issue is to collect research data in order to clarify possibilities, applications, and limitations of using recirculated air in combination with new air cleaning technologies in order to improve indoor air quality. The objective is to clarify the effectiveness of portable air cleaners and to investigate the approaches of using these devices, aiming at reducing the concentration of particles and gases in the indoor environment.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
