Message from the Guest Editors

Dear Colleagues,

There is growing attention on business model innovation for sustainability (BMIS), both in academic research and practice. The awareness among businesses, politicians, and citizens makes it clear that our current economic system is causing enormous sustainability issues, which make a transition to a more sustainable, circular economic system inevitable. A sustainable business model is expected to create economic, environmental, and social value. However, since business model innovation for sustainability is often associated with high (investment) costs and a constraint of a firm's profitability, sustainable business models are rejected (Geissdoerfer et al., 2017; Linder and Williander, 2017) or fail when implemented (Naor et al., 2018; Geissdoerfer et al., 2018; Evans et al., 2017; Bocken and Geradts, 2017).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
