Message from the Guest Editor

This Special Issue intends to bring together novel research on business innovation development and sustainability in economics for a broad audience of academic researchers, industry professionals and regulators.

We welcome submissions that represent original, high-quality, theoretical and empirical research, as well as policy-oriented research papers, which confer clear-cut findings to strengthen the knowledge of all areas of business, innovations and economic sustainability.

We especially encourage research that focuses on business technologies and applications that have been profoundly transforming the standard markets and, in turn, present new challenges and opportunities to economics and sustainability management research, including, but not limited to, the following topics: economics/competition, businesses/startups, data visualisation/Big Data, management/innovation, and climate/green.

Keywords

- innovation
- business
- economics sustainability
- market sustainability
- disrupted economy
