Message from the Collection Editors

Nowadays, sustainability is the basic condition for the survival and development of every organization and economy. Striving to achieve it in practice is a difficult and complex task, due to the different goals and aspirations of individual organizations and their stakeholders. In the ongoing discussion on the economic and business aspects of sustainability, we want to include all economic entities operating in both the private and public sectors. Therefore, the subjective scope of considerations includes:

- Enterprises;
- Nonprofit organizations;
- Cities, villages, regions, economies;
- Clusters, collaborative networks;
- Self-government authorities and organizations;
- Local and regional communities.
