Message from the Guest Editors

Dear Colleagues,

Businesses and consumers are currently facing unprecedented sustainability challenges; hence, sustainable development requires disruptive changes in the way our businesses and consumers act. The concept of circular economy presents a new model of design, production, consumption and disposal, which aims at tackling global issues such as climate change, biodiversity loss, waste, pollution, and inequity.

The purpose of this Special Issue is to facilitate an in-depth discussion on circular economy and technological innovation as a path toward sustainability and provide a forum for researchers in this area to disseminate research findings that can shed light on these critical issues. While the Special Issue is open to empirical research articles that offer theoretical and practical contributions to the areas of interest based on varied research methods, viz., qualitative, quantitative, or mixed methods, conceptual articles are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
